CIS Configurator for

SAP Business One

CIS Configurator combines web-based accessibility with great control options to create a flexible solution which can readily be expanded to manage quotations for in-house sales staff, dealers and reseller relationships. QuoteBuilder is seamlessly integrated with SAP Business One Order entry

Users outside of SAP Business One can create new quotes save the subsequent revisions, and then submit the quotation before confirming as an order and adding to SAP Business One order entry, with all details including BOM's generated by CIS Configurator

- Browser based, Web, Intranet
- Build to order
- Highly configured orders created speedily and accurately
- Rule based, dependencies, exceptions.
- Easy to use (training is in days)
- Easy to maintain
- Programming experience is not required
- Graphical representation of a configured item
- MS SQL database
- Dashboard and reporting
- Models and quote revisions

Call today to setup a one on one demonstration, you won't be disappointed...
